

EXPERT PROGRAM IN APPAREL PRODUCTION PLANNING & CONTROL (EPAPPC)

**240 HOURS****6 MONTHS**

The Expert Program in Apparel Production Planning & Control (EPAPPC) is a career-focused program designed to equip learners with the technical and managerial expertise required to oversee and streamline garment manufacturing processes. This program focuses on optimizing every stage of apparel production—from material procurement to finished goods—ensuring quality, efficiency, and timely delivery.

Students are trained in production workflow, quality control, cost management, supply chain operations, and industrial engineering techniques used in fashion manufacturing. With a strong emphasis on data-driven planning, lean production, and industry standards, this course prepares professionals to lead operations in export houses, garment factories, buying offices, and large-scale fashion brands.
