

Expert Program: Web Development

Duration: 120 Hours, 7 Months

This program focuses on back-end of the website creation. It teaches you all required technical aspects of the website including coding, interconnectivity of various pages, database management, triggers to perform specific tasks, debugging and error tracking, integration of all the contents (text, video, graphics and audio) seamlessly, and many more.

The website must be fully optimized in regards to fast loading, responsive layout structure, utilization of latest tools and technologies, secure browsing and many more related. Based on client needs, the specifications get changed. As an example, e-commerce website will need a robust payment gateway whereas news website will require proper configuration to handle heavy traffic.

What will you learn in this Program?

- Client side scripting.
- Server side scripting.
- Techniques to connect front-end and back-end.
- Domain related operations.
- Management of CMS (Content management system).
- Entire project planning and execution.
